

IT Leadership Development Forum

What's different about GrowthWave's IT Leadership Development Forum?

- 1** *This isn't training!* Effective leadership development can't happen in a training class. It takes time, focus and a proven process.
- 2** *It was designed by a CIO!* GrowthWave's Leadership program grew out of real-life CIO experiences. You will learn what it takes to be a successful IT leader today.
- 3** *It works!* Our process is unique. The dialogue and learning are constant...and so is your skill development. Everyone leaves with a Custom Action Plan for leadership growth.

Members of GrowthWave's IT Leadership Development Forum develop the leadership skills needed to move the business, IT and their careers forward.

Your technical talents got you to this point in your career, but they could derail you in management and leadership roles.

To move your career forward you need a different skill set – and a different mindset.

GrowthWave understands this better than anyone, and our Leadership Development Forum will give you the insights, strategies and guidance you need to grow as an IT leader.

Just a tip of the iceberg of what you will learn:

- Why CIOs/IT leaders fail – and how you can thrive as an IT leader
- The #1 ability executives wish you would develop
- The 3 critical traits of strong leaders – and how to develop them
- Why business leaders don't embrace IT – and how to change their minds
- What business-IT alignment is really all about and how to make it happen
- How to make IT steering committees work
- How IT can help drive business growth, profitability and innovation

All sessions are led by John Hughes, founder of GrowthWave and former CIO.
